A function with the start attribute was declared with type parameters.

Erroneous code example:

```
#![feature(start)]
#[start]
fn f<T>() {}
```

It is not possible to declare type parameters on a function that has the start attribute. Such a function must have the following type signature (for more information, view the unstable book):

```
# let _:
fn(isize, *const *const u8) -> isize;
Example:
#![feature(start)]
#[start]
fn my_start(argc: isize, argv: *const *const u8) -> isize {
    0
}
```
