This error occurs because you tried to mutably borrow a non-mutable variable.

Erroneous code example:

```
let x = 1;
let y = \&mut x; // error: cannot borrow mutably
```

In here,  $\, \, x \, \,$  isn't mutable, so when we try to mutably borrow it in  $\, \, y \,$  , it fails. To fix this error, you need to make  $\, \, x \,$  mutable:

```
let mut x = 1;
let y = &mut x; // ok!
```
