${\rm Home} > {\rm puppeteer} > {\rm Page} > {\rm emulateIdleState}$ 

## Page.emulateIdleState() method

Emulates the idle state. If no arguments set, clears idle state emulation.

Signature:

```
emulateIdleState(overrides?: {
    isUserActive: boolean;
    isScreenUnlocked: boolean;
}): Promise<void>;
```

## **Parameters**

Parameter	Type	Description
overrides	{ isUserActive: boolean; isScreenUnlocked: boolean; }	Mock idle state. If not set, clears idle overrides

Returns:

Promise<void>

## Example

```
// set idle emulation
await page.emulateIdleState({isUserActive: true, isScreenUnlocked: false});
// do some checks here
...
// clear idle emulation
await page.emulateIdleState();
```
