PuppeteerNode.executablePath() method

Signature:

```
executablePath(channel?: string): string;
```

Parameters

Parameter	Туре	Description
channel	string	

Returns:

string

A path where Puppeteer expects to find the bundled browser. The browser binary might not be there if the download was skipped with the PUPPETEER_SKIP_DOWNLOAD environment variable.

Remarks

NOTE puppeteer.executablePath() is affected by the PUPPETEER_EXECUTABLE_PATH and PUPPETEER_CHROMIUM_REVISION environment variables.
