Notable changes

An issue was solved with OSX dmg generation, affecting macOS 10.12 to 10.14, which could cause Finder to crash on install.

There are no significant changes for other operating systems.

0.17.0.1 change log

Build system

- #14416 `eb2cc84` Fix OSX dmg issue (10.12 to 10.14) (jonasschnelli)
