droplr

Use [Droplr](#) from the command line to upload files and shorten links. It needs to have [Droplr.app](#) installed and logged in. MacOS only.

To use it, add `droplr` to the `$plugins` variable in your zshrc file:

```
plugins=(... droplr)
```

Author: [Fabio Fernandes](#)

Examples

- Upload a file: `droplr ./path/to/file/`

- Shorten a link: `droplr https://example.com`
