Exclusion Criteria:

- Documentation on dependencies, packages, third party applications, submodules
- Non-English documentation (keep one representative)
- Only keep one representative of one type of (related) files that has many instances, such as Changelogs, examples, licenses.
- Source code files
- Text files that hold no onboarding related information that we can code
- Dummy text files
- Images
- Blog posts
- Technical documentation of the project, such as the documentations for every single component in Material-UI

Inclusion Criteria:

- All onboarding documents that we chose as main artifacts to code during our first pass:
  - CONTRIBUTING
  - CODE_OF_CONDUCT
  - COMMIT_CONVENTION
  - PULL_REQUEST_TEMPLATE
  - ISSUE_TEMPLATE
  - BUG_REPORT_TEMPLATE
  - READ_ME
  - ISSUES
  - LICENSE
  - WIKI
  - GOOD_FIRST_ISSUE
  - SECURITY
  - RELEASING
  - CHANGE_LOG
  - INSTALL
- Documents in the directories that has contributing related documentation
- Do not exclude the user-guide documents since it is difficult to make sure there is no useful information for newcomers
- Documentations that are not specifically excluded by the exclusion criteria
- Job posts
