Google Font Preconnect

Why This Error Occurred

A preconnect resource hint was not used with a request to the Google Fonts domain. Adding `preconnect` is recommended to initiate an early connection to the origin.

Possible Ways to Fix It

Add `rel="preconnect"` to the Google Font domain `<link>` tag:

```html
<link rel="preconnect" href="https://fonts.gstatic.com" />
```

Note: a **separate** link with `dns-prefetch` can be used as a fallback for browsers that don't support `preconnect` although this is not required.

Useful Links
