Invalid getStaticProps Return Value

Why This Error Occurred

In one of the page's `getStaticProps` the return value had the incorrect shape.

Possible Ways to Fix It

Make sure to return the following shape from `getStaticProps`:

```
export async function getStaticProps(ctx: {
    params?: ParsedUrlQuery;
    preview?: boolean;
    previewData?: PreviewData;
}) {
    return {
        props: { [key: string]: any }
    }
}
```
