Swag

Contains a bunch of helper functions for go-openapi and go-swagger projects.

You may also use it standalone for your projects.

- convert between value and pointers for builtin types
- convert from string to builtin types (wraps strconv)
- fast json concatenation
- search in path
- load from file or http
- name mangling

This repo has only few dependencies outside of the standard library:

- YAML utilities depend on gopkg.in/yaml.v2
