zh-CN

同样拥有顶部导航及侧边栏，区别是两边未留边距，多用于应用型的网站。

en-US

Both the top navigation and the sidebar, commonly used in application site.

```
import { Layout, Menu, Breadcrumb } from 'antd';
import { UserOutlined, LaptopOutlined, NotificationOutlined } from '@ant-
design/icons';

const { SubMenu } = Menu;
const { Header, Content, Sider } = Layout;

export default () => (
  <Layout>
    <Header className="header">
      <div className="logo" />
      <Menu theme="dark" mode="horizontal" defaultSelectedKeys={['2']}>
        <Menu.Item key="1">nav 1</Menu.Item>
        <Menu.Item key="2">nav 2</Menu.Item>
        <Menu.Item key="3">nav 3</Menu.Item>
      </Menu>
    </Header>
    <Layout>
      <Sider width={200} className="site-layout-background">
        <Menu
          mode="inline"
          defaultSelectedKeys={['1']}
          defaultOpenKeys={['sub1']}
          style={{ height: '100%', borderRight: 0 }}
        >
          <SubMenu key="sub1" icon={<UserOutlined />} title="subnav 1">
            <Menu.Item key="1">option1</Menu.Item>
            <Menu.Item key="2">option2</Menu.Item>
            <Menu.Item key="3">option3</Menu.Item>
            <Menu.Item key="4">option4</Menu.Item>
          </SubMenu>
          <SubMenu key="sub2" icon={<LaptopOutlined />} title="subnav 2">
