Invalid Multi-match

Why This Error Occurred

In one of your custom-routes you specified a multi-match `/:path*` and used it in your `destination` without adding the `*` in your `destination` e.g. `destination: '/another/:path'`

Possible Ways to Fix It

Add `*` to your usage of the multi-match param in your `destination` .

Before

```
{
  source: '/:path*',
  destination: '/another/:path'
}
```

After

```
{
  source: '/:path*',
  destination: '/another/:path*'
}
```
