We provide compiled CSS and JS (`bootstrap.*`), as well as compiled and minified CSS and JS
(`bootstrap.min.*`). [Source maps](`bootstrap.*.map`) are available for use with certain browsers' developer
tools. Bundled JS files (`bootstrap.bundle.js` and minified `bootstrap.bundle.min.js`) include [Popper].

Bugs and feature requests

Have a bug or a feature request? Please first read the [issue guidelines] and search for existing and closed issues. If
your problem or idea is not addressed yet, [please open a new issue].

Documentation

Bootstrap's documentation, included in this repo in the root directory, is built with [Hugo] and publicly hosted on
GitHub Pages at [https://getbootstrap.com/]. The docs may also be run locally.

Documentation search is powered by [Algolia's DocSearch]. Working on our search? Be sure to set `debug: true` in
`site/assets/js/search.js` .

Running documentation locally

1. Run `npm install` to install the Node.js dependencies, including Hugo (the site builder).
2. Run `npm run test` (or a specific npm script) to rebuild distributed CSS and JavaScript files, as well as our
   docs assets.
3. From the root `/bootstrap` directory, run `npm run docs-serve` in the command line.
4. Open `http://localhost:9001/` in your browser, and voilà.

Learn more about using Hugo by reading its [documentation].

Documentation for previous releases

You can find all our previous releases docs on [https://getbootstrap.com/docs/versions/].

[Previous releases] and their documentation are also available for download.

Contributing

Please read through our [contributing guidelines](#). Included are directions for opening issues, coding standards, and notes on development.

Moreover, if your pull request contains JavaScript patches or features, you must include [relevant unit tests](#). All HTML and CSS should conform to the [Code Guide](#), maintained by [Mark Otto](#).

Editor preferences are available in the [editor config](#) for easy use in common text editors. Read more and download plugins at https://editorconfig.org/.

Community

Get updates on Bootstrap's development and chat with the project maintainers and community members.

- Follow [@getbootstrap on Twitter](#).
- Read and subscribe to [The Official Bootstrap Blog](#).
- Join [the official Slack room](#).
- Chat with fellow Bootstrappers in IRC. On the `irc.libera.chat` server, in the `#bootstrap` channel.
- Implementation help may be found at Stack Overflow (tagged [`bootstrap-5`](#)).
- Developers should use the keyword `bootstrap` on packages which modify or add to the functionality of Bootstrap when distributing through [npm](#) or similar delivery mechanisms for maximum discoverability.

Versioning

For transparency into our release cycle and in striving to maintain backward compatibility, Bootstrap is maintained under [the Semantic Versioning guidelines](#). Sometimes we screw up, but we adhere to those rules whenever possible.

See [the Releases section of our GitHub project](#) for changelogs for each release version of Bootstrap. Release announcement posts on [the official Bootstrap blog](#) contain summaries of the most noteworthy changes made in each release.
