v5.0.0 (~2021)

- Discontinue [lodash-cli](#) in favor of bundling with [webpack](#)
- Discontinue [per method packages](#) in favor of modular [lodash](#)
- Drop support for unmaintained Node.js versions *(0.10, 0.12, 4, 5)*
- ES2015+ syntax using [babel-preset-env](#)
- Split "Collection" methods into array & object methods
- Remove monolithic entry point in favor of cherry-picking with [babel-plugin-lodash](#)
- Remove shorthand support by default
- Remove `_.ary`, `_.assignWith`, & `_.find`
- Remove `_.bind`, `_.curry`, `_.rest`, & `_.spread` variations in favor of built-in syntax
- Remove `_.omit` in favor of only `_.pick`
- Remove `_.partial`, `_.partialRight`, & `_.wrap` in favor of arrow functions
- Remove `_.sortBy` in favor of `_.orderBy`
- Remove `_.template` & `_.templateSettings` in favor of string template
- Reduce `lodash` package size by more than 94%
  - Minify & gzip modules *(will use a .gz loader)*
  - Move `lodash/fp` back to `lodash-fp` *(35% savings)*
  - Possibly move browser/core monolithic bundles to a separate package
- `camelCase`, `startCase`, `upperCase`, `kebabCase`, `lowerCase` and `snakeCase` do not deburr letters

Implemented

- Absorbed `_.sortByAll` into `_.sortBy` *(v4.0.0)*
- Added alias for `_#value` & API to replace the root value of a chain sequence *(v3.2.0)*
- Added AMD, ES, Node.js, & per method packages *(v2.0.0, v3.0.0)*
- Added deep property helpers *(v3.7.0)*
- Added implicit chaining *(v1.0.0-rc.3)*
- Added lazy evaluation to chaining methods *(v3.0.0)*
- Added math helpers *(v3.4.0)*
- Added string methods like `startsWith`, `endsWith`, & `trim` *(v3.0.0)*
- Added `_.mapKeys` *(v3.8.0)*
- Added `_.spread` *(v3.2.0)*
- Aligned `_.defaults` & `_.extend` with `Object.assign` *(v0.10.0)*
- Aligned `_.isFinite` & `_.keys` with ES2015 *(v3.0.0)*
- Changed default filename of compiled templates to `lodash.templates.js` *(v3.0.0)*
- Created a small 4 kB core build *(v4.0.0)*
- Dropped IE 6-8 support *(v4.0.0)*
- Dropped Node.js 0.6 support *(v3.0.0)*
- Dropped Node.js 0.8 support *(v4.0.0)*
- Enabled `_.merge` to deep merge properties onto functions *(v4.0.0)*
- Dropped support for the `csp`, `legacy`, `mobile`, & `underscore` builds *(v3.0.0)*
- Made `_.flatten` shallow by default instead of deep *(v3.0.0)*
- Made `_.forEach` implicitly end a chain sequence *(v4.0.0)*
- Made `_.max` & `_.min` non-chainable by default *(v3.0.0)*
- Moved website to [Netlify](#) *(Sept. 2016)*
- Split out `_.max`, `_.min`, `_.sum`, & `_.uniq` *(v4.0.0)*
- Renamed `_.createCallback` to `_.callback` *(v3.0.0)*
- Removed the `data` parameter from `_.template` *(v3.0.0)*

- Removed result sorting from `_.functions` *(v3.0.0)*
- Removed `_.findWhere`, `_.pluck`, & `_.where` *(v4.0.0)*
- Removed aliases *(v4.0.0)*

  `_.all`, `_.any`, `_.backflow`, `_.callback`, `_.collect`, `_.compose`, `_.contains`, `_.detect`, `_.foldl`, `_.foldr`, `_.include`, `_.inject`, `_.methods`, `_.object`, `_#run`, `_.select`, & `_.unique`
