Link passHref

Why This Error Occurred

passHref was not used for a `Link` component that wraps a custom component. This is needed in order to pass the `href` to the child `<a>` tag.

Possible Ways to Fix It

If you're using a custom component that wraps an `<a>` tag, make sure to add passHref:

```
import Link from 'next/link'
import styled from 'styled-components'

const StyledLink = styled.a`
  color: red;
`

function NavLink({ href, name }) {
  return (
    <Link href={href} passHref>
      <StyledLink>{name}</StyledLink>
    </Link>
  )
}

export default NavLink
```
