Environment Variables Example

This example shows how to use [environment variables in Next.js](#).

The index page ([pages/index.js](#)) will show you how to [access environment variables in the server](#), and how to [expose environment variables to the browser](#).

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

[▲   Deploy](#)

How to use

Execute [`create-next-app`](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example environment-variables environment-variables-app
# or
yarn create next-app --example environment-variables environment-variables-app
# or
pnpm create next-app -- --example environment-variables environment-variables-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
