The Code project consists of the `vscode` repository plus a number of satellite projects.

Core Repositories

Component	Repository
Standalone Monaco Editor	monaco-editor
Node Debug (for node < v8.0)	vscode-node-debug
Node Debug (for node >= v6.3)	vscode-node-debug2
Node Debug Adapter	vscode-debugadapter-node
Chrome Debug Core	vscode-chrome-debug-core
File Watcher	vscode-filewatcher-windows
`vscode.d.ts`	vscode-extension-code
`vscode-languageserver`	vscode-languageserver-node
TextMate tokenizer	vscode-textmate
AMD Loader	vscode-loader
Windows Process Tree	vscode-windows-process-tree
References View	vscode-references-view
Octicons Font	vscode-octicons-font
Terminal frontend	xterm.js
Terminal backend	node-pty

SDK Tools

Tool	Repository
yo code generator	vscode-generator-code
vsce publishing tool	vscode-vsce
Telemetry for extensions	vscode-extension-telemetry
NLS Tools	NLS Tools

Documentation

Repository
vscode-docs

Languages

Language	Repository
Language server protocol	Language Server Protocol

Language	Repository
CSS/LESS/SCSS Language Service	vscode-css-languageservice
JSON Language Service	vscode-json-languageservice
HTML Language Service	vscode-html-languageservice
Go	vscode-go
Emmet Helper	vscode-emmet-helper
Markdown Textmate Grammar	vscode-markdown-tm-grammar

Localization

Tool	Repository
NLS Tools	NLS Tools

Source Code Control

Provider	Repository
Github	Github Pull Requests

Linters

Linter	Repository
TSLint	vscode-tslint
TSLint TypeScript Plugin	vscode-typescript-tslint-plugin
ESLint	vscode-eslint
jshint	vscode-jshint

Debuggers

Debugger	Repository
Chrome Debugger	vscode-chrome-debug

NPM

Repository
vscode-npm-scripts

Keybindings

Tool	Repository
Sublime	vscode-sublime-keybindings
Atom	vscode-atom-keybindings
Visual Studio	vscode-vs-keybindings

Themes

Theme
vscode-themes

Samples

Sample	Repository
Mock Debug Adapter	vscode-mock-debug
Samples	vscode-extension-samples
Debugging Recipes	vscode-recipes
