zh-CN

基本标签的用法，可以通过添加 `closable` 变为可关闭标签。可关闭标签具有 `onClose` 事件。

en-US

Usage of basic Tag, and it could be closable by set `closable` property. Closable Tag supports `onClose` events.

```jsx
import { Tag } from 'antd';

function log(e) {
  console.log(e);
}

function preventDefault(e) {
  e.preventDefault();
  console.log('Clicked! But prevent default.');
}

export default () => (
  <>
    <Tag>Tag 1</Tag>
    <Tag>
      <a href="https://github.com/ant-design/ant-design/issues/1862">Link</a>
    </Tag>
    <Tag closable onClose={log}>
      Tag 2
    </Tag>
    <Tag closable onClose={preventDefault}>
      Prevent Default
    </Tag>
  </>
);
```
