This is a [Next.js](#) project bootstrapped with `create-next-app` .

Getting Started

First, run the development server:

```
npm run dev
# or
yarn dev
```

Open http://localhost:3000 with your browser to see the result.

You can start editing the page by modifying `pages/index.tsx` . The page auto-updates as you edit the file.

[API routes](#) can be accessed on http://localhost:3000/api/hello. This endpoint can be edited in `pages/api/hello.ts` .

The `pages/api` directory is mapped to `/api/*` . Files in this directory are treated as [API routes](#) instead of React pages.

Learn More

To learn more about Next.js, take a look at the following resources:

- [Next.js Documentation](#) - learn about Next.js features and API.
- [Learn Next.js](#) - an interactive Next.js tutorial.

You can check out [the Next.js GitHub repository](#) - your feedback and contributions are welcome!

Deploy on Vercel

The easiest way to deploy your Next.js app is to use the [Vercel Platform](#) from the creators of Next.js.

Check out our [Next.js deployment documentation](#) for more details.
