git-hubflow plugin

This plugin adds completion for [HubFlow](#) (GitFlow for GitHub), as well as some aliases for common commands. HubFlow is a git extension to make it easy to use GitFlow with GitHub. Based on the original gitflow extension for git.

The hubflow tool has to be [installed](#) separately.

To use it, add `git-hubflow` to the plugins array in your zshrc file:

```
plugins=(... git-hubflow)
```

Aliases

Alias	Command	Description
ghf	`git hf`	Print command overview
ghff	`git hf feature`	Manage your feature branches
ghfr	`git hf release`	Manage your release branches
ghfh	`git hf hotfix`	Manage your hotfix branches
ghfs	`git hf support`	Manage your support branches
ghfu	`git hf update`	Pull upstream changes down into your master and develop branches
