CHANGELOG

This changelog was discontinued after version 0.9.2+2, when the package started to vend from the Flutter SDK rather than pub.

It is maintained here for historical purposes only.

0.9.2+2

- Broaden the constraint on vm_service.

0.9.2+1

- Update android compileSdkVersion to 29.

0.9.2

- Add `watchPerformance` for performance test.

0.9.1

- Keep handling deprecated Android v1 classes for backward compatibility.

0.9.0

- Add screenshot capability to web tests.

0.8.2

- Add support to get timeline.

0.8.1

- Show stack trace of widget test errors on the platform side
- Fix method channel name for iOS

0.8.0

- Rename plugin to integration_test.

0.7.0

- Move utilities for tracking frame performance in an e2e test to `flutter_test`.

0.6.3

- Add customizable `flutter_driver` adaptor.
- Add utilities for tracking frame performance in an e2e test.

0.6.2+1

- Fix incorrect test results when one test passes then another fails

0.6.2

- Fix `setSurfaceSize` for e2e tests

0.6.1

- Added `data` in the reported json.

0.6.0

- **Breaking change** `E2EPlugin` exports a `Future` for `testResults`.

0.5.0+1

- Fixed the device pixel ratio problem.

0.5.0

- **Breaking change** by default, tests will use the device window size. Tests can still override the window size by using the `setSurfaceSize` method.
- **Breaking change** If using Flutter 1.19.0-2.0.pre.196 or greater, the `testTextInput` will no longer automatically register.
- **Breaking change** If using Flutter 1.19.0-2.0.pre.196 or greater, the `HttpOverrides` will no longer be set by default.
- Minor formatting changes to Dart code.

0.4.3+3

- Fixed code snippet in readme that referenced a non-existent `result` variable.

0.4.3+2

- Bumps AGP to 3.6.3
- Changes android-retrofuture dependency type to "implementation"

0.4.3+1

- Post-v2 Android embedding cleanup.

0.4.3

- Uses CompletableFuture from android-retrofuture allow compatibility with API < 24.

0.4.2

- Adds support for Android E2E tests that utilize other @Rule's, like GrantPermissionRule.
- Fix CocoaPods podspec lint warnings.

0.4.1

- Remove Android dependencies fallback.
- Require Flutter SDK 1.12.13+hotfix.5 or greater.

0.4.0

- **Breaking change** Driver request_data call's response has changed to encapsulate the failure details.
- Details for failure cases are added: failed method name, stack trace.

0.3.0+1

- Replace deprecated `getFlutterEngine` call on Android.

0.3.0

- Updates documentation to instruct developers not to launch the activity since we are doing it for them.
- Renames `FlutterRunner` to `FlutterTestRunner` to avoid conflict with Fuchsia.

0.2.4+4

- Fixed a hang that occurred on platforms that don't have a `MethodChannel` listener registered..

0.2.4+3

- Fixed code snippet in the readme under the "Using Flutter driver to run tests" section.

0.2.4+2

- Make the pedantic dev_dependency explicit.

0.2.4+1

- Registering web service extension for using e2e with web.

0.2.4

- Fixed problem with XCTest in XCode 11.3 where the testing bundles were getting opened multiple times which interfered with the singleton logic for E2EPlugin.

0.2.3+1

- Added a driver test for failure behavior.

0.2.3

- Updates `E2EPlugin` and add skeleton iOS test case `E2EIosTest`.
- Adds instructions to README.md about e2e testing on iOS devices.
- Adds iOS e2e testing to example.

0.2.2+3

- Remove the deprecated `author:` field from pubspec.yaml
- Migrate the plugin to the pubspec platforms manifest.
- Require Flutter SDK 1.10.0 or greater.

0.2.2+2

- Adds an android dummy project to silence warnings and removes unnecessary .gitignore files.

0.2.2+1

- Fix pedantic lints. Adds a missing await in the example test and some missing documentation.

0.2.2

- Added a stub macos implementation
- Added a macos example

0.2.1+1

- Updated README.

0.2.1

- Support the v2 Android embedder.
- Print a warning if the plugin is not registered.
- Updated method channel name.
- Set a Flutter minimum SDK version.

0.2.0+1

- Updated README.

0.2.0

- Renamed package from instrumentation_adapter to e2e.
- Refactored example app test.
- **Breaking change**. Renamed `InstrumentationAdapterFlutterBinding` to `IntegrationTestWidgetsFlutterBinding`.
- Updated README.

0.1.4

- Migrate example to AndroidX.
- Define clang module for iOS.

0.1.3

- Added example app.
- Added stub iOS implementation.
- Updated README.
- No longer throws errors when running tests on the host.

0.1.2

- Added support for running tests using Flutter driver.

0.1.1

- Updates about using *androidx* library.

0.1.0

- Update boilerplate test to use `@Rule` instead of `FlutterTest`.

0.0.2

- Document current usage instructions, which require adding a Java test file.

0.0.1

- Initial release
