Intro

These items are a general checklist for when we create new features that is based off our design principles.

Design checklist

- ☐ Is this accessible?
    - ☐ Does it pass the color contrast ratio requirement?
    - ☐ Does it support keyboard navigation (i.e. keyboard only)?
    - ☐ Does it have the proper markup (name, role, value)?
    - ☐ Are the text links meaningful?
- ☐ Is this customizable?
    - ☐ Can extensions contribute to this?
    - ☐ Can users define keybindings for actions?
    - ☐ Are the setting names and descriptions clear?
- ☐ Is this simple?
    - ☐ Are these incremental changes (i.e. can it be broken down)?
    - ☐ Are text descriptions clear and easy to understand?
    - ☐ Can you re-use existing components/patterns?
    - ☐ Do your icons make sense?
    - ☐ Have you tested this with users?
- ☐ Is this delightful?
    - ☐ Is input from the user contextual?
    - ☐ Are user actions optimized (i.e. can we reduce the number of steps)?
    - ☐ Can we reduce the load time?
