PowerToy ModuleTemplate

Introduction

This project is used to generate the Visual Studio PowerToys Module Template

Instruction

In Visual Studio from the menu Project->Export Template. . . generate the template. Set the name `PowerToys Module`, add a description `A project for creating a PowerToys module` and an icon. Open the resulting .zip file in `%USERNAME%\Documents\Visual Studio 2022\Templates\ProjectTemplates` and edit `MyTemplate.vstemplate` to make the necessary changes, the resulting template should look like this:

```
<VSTemplate Version="3.0.0" xmlns="http://schemas.microsoft.com/developer/vstemplate/2005" T
  <TemplateData>
    <Name>PowerToys Module</Name>
    <Description>A project for creating a PowerToys module</Description>
    <ProjectType>VC</ProjectType>
    <ProjectSubType>
    </ProjectSubType>
      <LanguageTag>C++</LanguageTag>
      <PlatformTag>windows</PlatformTag>
