        - Select the output format of the audio (mono left/right, stereo).
```

Description

This ioctl is obsolete. Do not use in new drivers. It has been replaced by the V4L2
`V4L2_CID_MPEG_AUDIO_DEC_MULTILINGUAL_PLAYBACK` control for MPEG decoders controlled through V4L2.

This ioctl call asks the Audio Device to select the requested channel for bilingual streams if possible.

Return Value

On success 0 is returned, on error -1 and the `errno` variable is set appropriately. The generic error codes are described at the

:ref:`Generic Error Codes <gen-errors>` chapter.
