BrowserLaunchArgumentOptions interface

Launcher options that only apply to Chrome.

Signature:

```
export interface BrowserLaunchArgumentOptions
```

Properties

Property	Type	Description
[args?](#)	string[]	*(Optional)* Additional command line arguments to pass to the browser instance.
[devtools?](#)	boolean	*(Optional)* Whether to auto-open a DevTools panel for each tab. If this is set to `true`, then `headless` will be set to `false` automatically.
[headless?](#)	boolean	*(Optional)* Whether to run the browser in headless mode.
[userDataDir?](#)	string	*(Optional)* Path to a user data directory. [see the Chromium docs](#) for more info.
