Redux Toolkit TypeScript Example

This example shows how to integrate Next.js with [Redux Toolkit](#).

The **Redux Toolkit** is a standardized way to write Redux logic (create actions and reducers, setup the store with some default middlewares like redux devtools extension). This example demonstrates each of these features with Next.js

Deploy your own

Deploy the example using [Vercel](#):

▲ Deploy

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-redux with-redux-app
# or
yarn create next-app --example with-redux with-redux-app
# or
pnpm create next-app -- --example with-redux with-redux-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
