Terraform plugin

Plugin for Terraform, a tool from Hashicorp for managing infrastructure safely and efficiently. It adds completion for `terraform`, as well as aliases and a prompt function.

To use it, add `terraform` to the plugins array of your `~/.zshrc` file:

```
plugins=(... terraform)
```

Requirements

- Terraform

Aliases

Alias	Command
tf	terraform
tfa	terraform apply
tfd	terraform destroy
tff	terraform fmt
tfi	terraform init
tfo	terraform output
tfp	terraform plan
tfv	terraform validate

Prompt function

You can add the current Terraform workspace in your prompt by adding `$(tf_prompt_info)` to your `PROMPT` or `RPROMPT` variable.

```
RPROMPT='$(tf_prompt_info)'
```

You can also specify the PREFIX and SUFFIX for the workspace with the following variables:

```
ZSH_THEME_TF_PROMPT_PREFIX="%{$fg[white]%}"
ZSH_THEME_TF_PROMPT_SUFFIX="%{$reset_color%}"
```
