Fuzzing trophy case

This page collects issues that have been discovered using [Go's native fuzzing](#).

Contributing

If native fuzzing uncovered a bug in your project, please consider adding it to this list by editing this Wiki page directly, or by reaching out to katie@golang.org with the bug you'd like to share.

Note: If you think the bug is a security issue, please report it responsibly to the respective team, and do not include it in this list until public disclosure.

Trophies

Standard Library

- [go/scanner: inconsistent handling of NUL bytes in 1.17](#)
- [time: ParseDuration can panic on invalid input](#)

Other projects

- [go-yaml/yaml/v3: yaml.Unmarshal() crashes on "#\n - - QI\xd7"](#)
- [josephburnett/jd: crashes when validating JSON Patch test/replace operation](#)
- [josephburnett/jd: JSON Patch to void failing round-trip](#)
- [kokes/smda: nil pointer error](#)
- [kokes/smda: out of bounds error](#)
- [mvdan.cc/sh: syntax.Quote failed to quote the empty string](#)
- [mvdan.cc/sh: syntax.Quote misused `\x` escape sequences in mksh](#)
- [mvdan.cc/sh: syntax.Quote can't quote the `0xFFFE` and `0xFFFF` runes in mksh](#)
- [pelletier/go-toml: index out of range error in expect function](#)
- [swaggest/form: panic on invalid keys in request](#)
- [yuin/goldmark: corner case errors](#)
