Shallow Routing Example

With [Shallow Routing](), we can change the URL without running data fetching methods (like `getStaticProps` and `getServerSideProps`) again.

We do this by passing the `shallow: true` option to `Router.push` or `Router.replace` .

Deploy your own

Deploy the example using [Vercel]() or preview live with [StackBlitz]()

▲ Deploy

How to use

Execute `create-next-app` with [npm]() or [Yarn]() to bootstrap the example:

```
npx create-next-app --example with-shallow-routing with-shallow-routing-app
# or
yarn create next-app --example with-shallow-routing with-shallow-routing-app
# or
pnpm create next-app -- --example with-shallow-routing with-shallow-routing-app
```

Deploy it to the cloud with [Vercel]() ([Documentation]()).
