用 `OptGroup` 进行选项分组。

en-US

Using `OptGroup` to group the options.

```jsx
import { Select } from 'antd';

const { Option, OptGroup } = Select;

function handleChange(value) {
  console.log(`selected ${value}`);
}

export default () => (
  <Select defaultValue="lucy" style={{ width: 200 }} onChange={handleChange}>
    <OptGroup label="Manager">
      <Option value="jack">Jack</Option>
      <Option value="lucy">Lucy</Option>
    </OptGroup>
    <OptGroup label="Engineer">
      <Option value="Yiminghe">yiminghe</Option>
    </OptGroup>
  </Select>
);
```
