Drush

This plugin adds aliases and functions for Drush, a command-line shell and Unix scripting interface for Drupal. It also adds completion for the `drush` command.

To enable it, add `drush` to the plugins array in zshrc file:

```
plugins=(... drush)
```

Aliases

Alias	Command	Description
dr	drush	Display drush help
drca	drush cc all	*(Deprecated in Drush 8)* Clear all drupal caches
drcb	drush cc block	*(Deprecated in Drush 8)* Clear block cache

drws	drush watchdog:show	Show watchdog messages
drwse	drush watchdog:show --extended	Show watchdog messages with extended information
drwst	drush watchdog:tail	Tail watchdog messages

Functions

- `dren`: download and enable one or more extensions (modules or themes). Must be invoked with one or more parameters, e.g.: `dren devel` or `dren devel module_filter views`.

- `drf`: edit drushrc, site alias, and Drupal settings.php files. Can be invoked with one or without parameters, e.g.: `drf 1`.

- `dris`: disable one or more extensions (modules or themes). Must be invoked with one or more parameters, e.g.: `dris devel` or `dris devel module_filter views`.

- `drpu`: uninstall one or more modules. Must be invoked with one or more parameters, e.g.: `drpu devel` or `drpu devel module_filter views`.

- `drnew`: creates a brand new drupal website. Note: as soon as the installation is complete, `drush` will print a username and a random password into the terminal:

  ```
  Installation complete.  User name: admin  User password: cf7t8yqNEm
  ```
