chruby plugin

This plugin loads [chruby,](#) a tool that changes the current Ruby version, and completion and a prompt function to display the Ruby version. Supports brew and manual installation of chruby.

To use it, add `chruby` to the plugins array in your zshrc file:

```
plugins=(... chruby)
```

Usage

If you'd prefer to specify an explicit path to load chruby from you can set variables like so:

```
zstyle :omz:plugins:chruby path /local/path/to/chruby.sh
zstyle :omz:plugins:chruby auto /local/path/to/auto.sh
```
