Using Multiple Themes

This repository demonstrates how to use multiple themes in a Gatsby site

---

In this section you will see how to compose multiple themes into a final site using gatsby-theme-blog, gatsby-theme-notes and gatsby-mdx-embed as examples. It will also cover the concept of component shadowing with Theme-UI for styling.

🔧 Running locally

The site can be run locally on your own computer as well by following these steps:

1. Clone the `gatsby` repository

```
git clone git@github.com:gatsbyjs/gatsby.git
```

2. Navigate to the example

```
cd gatsby/examples/using-multiple-themes
```

3. Install the dependencies for the application by running

```
npm install
```

4. Run the Gatsby development server

```
gatsby develop
```

The site is now running at `http://localhost:8000`, you can see your first post at `http://localhost:8000/hello-posts/`
