修改默认组件尺寸。

en-US

Config component default size.

```jsx
import React, { useState } from 'react';
import {
  ConfigProvider,
  Radio,
  Input,
  Button,
  Select,
  DatePicker,
  Divider,
  Table,
  Card,
  Tabs,
} from 'antd';

const { TabPane } = Tabs;

const FormSizeDemo = () => {
  const [componentSize, setComponentSize] = useState('small');
  return (
    <div>
      <Radio.Group
        value={componentSize}
        onChange={e => {
          setComponentSize(e.target.value);
        }}
      >
        <Radio.Button value="small">Small</Radio.Button>
        <Radio.Button value="middle">Middle</Radio.Button>
        <Radio.Button value="large">Large</Radio.Button>
      </Radio.Group>
      <Divider />
      <ConfigProvider componentSize={componentSize}>
        <div className="example">
          <Input />
        </div>
        <div className="example">
          <Tabs defaultActiveKey="1">
            <TabPane tab="Tab 1" key="1">
              Content of Tab Pane 1
            </TabPane>
            <TabPane tab="Tab 2" key="2">
              Content of Tab Pane 2
            </TabPane>
```

```
          <TabPane tab="Tab 3" key="3">
            Content of Tab Pane 3
          </TabPane>
        </Tabs>
      </div>
      <div className="example">
        <Input.Search allowClear />
      </div>
      <div className="example">
        <Input.TextArea allowClear />
      </div>
