tmux

This plugin provides aliases for tmux, the terminal multiplexer. To use it add `tmux` to the plugins array in your zshrc file.

`plugins=(... tmux)`

The plugin also supports the following:

- determines if tmux is installed or not, if not, prompts user to install tmux
- determines if the terminal supports the 256 colors or not, sets the appropriate configuration variable
- sets the correct local config file to use
