The `golang.org/x/...` repositories are part of the Go Project but outside the main Go tree.

They are developed under looser [compatibility requirements](#) than the Go core. In general, they will support the previous two releases and tip.

These repositories should have no third-party dependencies apart from other golang.org/x/... repositories. The only exceptions are [golang.org/x/tools/gopls](#), [golang.org/x/vscode-go](#), and [golang.org/x/pkgsite](#). If you would like to add a new dependency to an x repository, please [file an issue](#) and cc [@rsc](#) and [@andybons](#).

Install them with "go get".

- [[docs](#)] [[source](#)] `golang.org/x/tools` — godoc, vet, cover, and other tools.

- [[docs](#)] [[source](#)] `golang.org/x/mobile` — libraries and build tools for Go on Android.

- [[docs](#)] [[source](#)] `golang.org/x/crypto` — additional cryptography packages.

- [[docs](#)] [[source](#)] `golang.org/x/image` — additional imaging packages.

- [[docs](#)] [[source](#)] `golang.org/x/net` — additional networking packages.

- [[docs](#)] [[source](#)] `golang.org/x/sys` — for low-level interactions with the operating system.

- [[docs](#)] [[source](#)] `golang.org/x/text` — packages for working with text.

- [[docs](#)] [[source](#)] `golang.org/x/blog` — the content and server program for [blog.golang.org](#).

- [[docs](#)] [[source](#)] `golang.org/x/review` — tools for code review.

- [[docs](#)] [[source](#)] `golang.org/x/benchmarks`

- [[docs](#)] [[source](#)] `golang.org/x/exp` — experimental code (handle with care).
