Border

Use border utilities to add or remove an element's borders. Choose from all borders or one at a time.

Additive

{{< example class="bd-example-border-utils" >}} {{< /example >}}

Subtractive

{{< example class="bd-example-border-utils bd-example-border-utils-0" >}} {{< /example >}}

Border color

Change the border color using utilities built on our theme colors.

{{< example class="bd-example-border-utils" >}} {{< border.inline >}} {{- range (index $.Site.Data "theme-colors") }} {{- end -}} {{< /border.inline >}} {{< /example >}}

Border-width

{{< example class="bd-example-border-utils" >}} {{< /example >}}

Border-radius

Add classes to an element to easily round its corners.

{{< example class="bd-example-rounded-utils" >}} {{< placeholder width="75" height="75" class="rounded" title="Example rounded image" >}} {{< placeholder width="75" height="75" class="rounded-top" title="Example top rounded image" >}} {{< placeholder width="75" height="75" class="rounded-end" title="Example right rounded image" >}} {{< placeholder width="75" height="75" class="rounded-bottom" title="Example bottom rounded image" >}} {{< placeholder width="75" height="75" class="rounded-start" title="Example left rounded image" >}} {{< placeholder width="75" height="75" class="rounded-circle" title="Completely round image" >}} {{< placeholder width="150" height="75" class="rounded-pill" title="Rounded pill image" >}} {{< /example >}}

Sizes

Use the scaling classes for larger or smaller rounded corners. Sizes range from `0` to `3`, and can be configured by modifying the utilities API.

{{< example class="bd-example-rounded-utils" >}} {{< placeholder width="75" height="75" class="rounded-0" title="Example non-rounded image" >}} {{< placeholder width="75" height="75" class="rounded-1" title="Example small rounded image" >}} {{< placeholder width="75" height="75" class="rounded-2" title="Example default rounded image" >}} {{< placeholder width="75" height="75" class="rounded-3" title="Example large rounded image" >}} {{< /example >}}

Sass

Variables

{{< scss-docs name="border-variables" file="scss/_variables.scss" >}}

{{< scss-docs name="border-radius-variables" file="scss/_variables.scss" >}}

Mixins

{{< scss-docs name="border-radius-mixins" file="scss/mixins/_border-radius.scss" >}}

Utilities API

Border utilities are declared in our utilities API in `scss/_utilities.scss` . [Learn how to use the utilities API.]({{< docsref "/utilities/api#using-the-api" >}})
