## Browser.createIncognitoBrowserContext() method

Creates a new incognito browser context. This won't share cookies/cache with other browser contexts.

Signature:

```
createIncognitoBrowserContext(): Promise<BrowserContext>;
```

Returns:

Promise<BrowserContext>

## Example

```
(async () => {
 const browser = await puppeteer.launch();
  // Create a new incognito browser context.
  const context = await browser.createIncognitoBrowserContext();
  // Create a new page in a pristine context.
  const page = await context.newPage();
  // Do stuff
  await page.goto('https://example.com');
})();
```
