`box_syntax`

The tracking issue for this feature is: [#49733](#49733)

See also `box_patterns`

Currently the only stable way to create a `Box` is via the `Box::new` method. Also it is not possible in stable Rust to destructure a `Box` in a match pattern. The unstable `box` keyword can be used to create a `Box`. An example usage would be:

```rust
#![feature(box_syntax)]

fn main() {
    let b = box 5;
}
```
