Next.js server-side benchmarks

Installation

Follow the steps in contributing.md

Both benchmarks use `ab` . So make sure you have that installed.

Usage

Before running the test:

```
npm run start
```

Then run one of these tests:

- Stateless application which renders `<h1>My component!</h1>` . Runs 3000 http requests.

```
npm run bench:stateless
```

- Stateless application which renders `<li>This is row {i}</li>` 10.000 times. Runs 500 http requests.

```
npm run bench:stateless-big
```
