Go terminal/console support

This repository provides Go terminal and console support packages.

Download/Install

The easiest way to install is to run `go get -u golang.org/x/term`. You can also manually git clone the repository to `$GOPATH/src/golang.org/x/term`.

Report Issues / Send Patches

This repository uses Gerrit for code changes. To learn how to submit changes to this repository, see https://golang.org/doc/contribute.html.

The main issue tracker for the term repository is located at https://github.com/golang/go/issues. Prefix your issue with "x/term:" in the subject line, so it is easy to find.
