example.js

```js
import { increment as inc, value } from "./counter";
import { resetCounter, print } from "./methods";
print(value);
inc();
inc();
inc();
print(value);
resetCounter();
print(value);

export { inc, print };
```

methods.js

```js
export { reset as resetCounter } from "./counter";

export const print = value => console.log(value);
```

counter.js

```js
export let value = 0;
export function increment() {
    value++;
}
export function decrement() {
    value--;
}
export function reset() {
    value = 0;
}
```
