percol

Provides some useful function to make percol work with zsh history and the jump plugin, optionally.

To use it, add `percol` to the plugins array in your zshrc:

```
plugins=(... percol)
```

Requirements

- `percol`: install with `pip install percol`.
- (*Optional*) `jump` plugin: needs to be enabled before the `percol` plugin.

Usage

- CTRL-R (bound to `percol_select_history`): you can use it to grep your history with percol.
- CTRL-B (bound to `percol_select_marks`): you can use it to grep your jump bookmarks with percol.
