Angular Compatibility Compiler (ngcc)

This compiler will convert `node_modules` compiled with `ngc`, into `node_modules` which appear to have been compiled with `ngtsc`.

This conversion will allow such "legacy" packages to be used by the Ivy rendering engine.

Building

The project is built using Bazel:

```
yarn bazel build //packages/compiler-cli/ngcc
```

Unit Testing

The unit tests are built and run using Bazel:

```
yarn bazel test //packages/compiler-cli/ngcc/test
```

Integration Testing

There are tests that check the behavior of the overall executable:

```
yarn bazel test //packages/compiler-cli/ngcc/test:integration
```
