Autoenv plugin

This plugin loads the [Autoenv](#).

To use it, add `autoenv` to the plugins array in your zshrc file:

```
plugins=(... autoenv)
```

Functions

- `use_env()` : creates and/or activates a virtualenv. For use in `.env` files. See the source code for details.

Requirements

In order to make this work, you will need to have the autoenv installed.

More info on the usage and install at [the project's homepage](#).
