API Routes Example with CORS

Next.js ships with [API routes](#) which provides an easy solution to build your own `API`.

This example shows how to create an `API` endpoint with [CORS](#) headers, using the [cors](#) package.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

[▲ Deploy]

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example api-routes-cors api-routes-cors-app
# or
yarn create next-app --example api-routes-cors api-routes-cors-app
# or
pnpm create next-app -- --example api-routes-cors api-routes-cors-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
