Layout component example

This example shows a very common use case when building websites where you need to repeat some sort of layout for all your pages. Our pages are: `home` , `about` and `contact` and they all share the same layout and sidebar.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

[▲ Deploy]

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example layout-component layout-component-app
# or
yarn create next-app --example layout-component layout-component-app
# or
pnpm create next-app -- --example layout-component layout-component-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
