Fast Refresh Demo

Next.js ships with [Fast Refresh](#) which gives you instantaneous feedback on edits made to your React components.

This demos shows how the state of an auto incrementing value and a classic counter is preserved after edits or if there are errors.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

[▲   Deploy]

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example fast-refresh-demo fast-refresh-demo-app
# or
yarn create next-app --example fast-refresh-demo fast-refresh-demo-app
# or
pnpm create next-app -- --example fast-refresh-demo fast-refresh-demo-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
