Dashboard Permissions API

This API can be used to update/get the permissions for a dashboard.

Permissions with `dashboardId=-1` are the default permissions for users with the Viewer and Editor roles. Permissions can be set for a user, a team or a role (Viewer or Editor). Permissions cannot be set for Admins - they always have access to everything.

The permission levels for the permission field:

- 1 = View
- 2 = Edit
- 4 = Admin

Get permissions for a dashboard
