🚧 THIS PAGE IS UNDER CONSTRUCTION🚧

Construction todo:

- ☐ Add links to applications
- ☐ Add links to docs pages
- ☐ Find more apps

🚧🚧🚧🚧🚧🚧

This is a list of applications that are shipping third-party "terminal fragments", to add custom profiles or color schemes to the Windows Terminal.

- git bash
- Julia for Windows ([Windows Store Link](#)) ([fragment source code](#))
- the Ubuntu app (? unsure if this shipped yet)
